Sugar is supposed to give zest to the taste. Diabetes is claimed by erring multitudes to be a result of the excessive eating of sweets. True, you might eat enough sweets to cause the appearance of them in the kidney fuids, but the condition would be only temporary and could not by any means be called diabetes.

Gauging the Various Elements.

Diabetes is a definite affliction which occurs when the pancrease is affected, injured, deformed or is otherwise changed from its normal state. When certain destructive alterations of the brain take place, when the adrenal glands, which surmount the kidneys, undergo changes of one sort or another, and when the liver and muscles are no longer able to contain their supply of sugar, diabetes may be evidenced. In other words, there comes about the discovery of sugar in the blood stream and whirlpools of

Previous to his development of the new treatment it was generally considered by physicians that patients recovering from diabetes should take on flesh to help build up resistance against "wasting disease." but now, it is claimed, a patient should remain under weight always, even after recovery from the disease, to prevent a recurrence of

QUERIES ANSWERED THE CHAPERON

Replies to Various Problems That Puzzle Readers of The Times.

Dear Chaperon: I am twenty-two years old, have two children, and am married five years. My husband is twenty-nine years old, and is all a woman could wish her husband to be, except that on occasions he forgets himself, and unthinkingly acts kind of rudely.

For instance, when he metts me on the street he never raises his hat, while he certainly would to any other woman. Then, again, if in the movies or at the theater, I should say anything with which he doesn't agree, he will tell me in a loud whisper that others can hear—to shut up. Outwardly I take no notice of this, but it

hurts my feelings very much.

I tried once to tell him about it, but he would not listen. I love him very much, and we get along very nicely together. But as this rudeness occurs very often it is making me think he doesn't care for me so much now. I often sit and think about this, but can think of no way out.

Because your husband forgets the little niceties that all women love is absolutely no indication that he is growing cold toward you. But I am glad you called yourself "Sensitive," because that is exactly the word that suits you. And for a wife to be sensi-tive is a calamity. More homes are recked because of it than almost any

IRWIN SUGGESTS PLAN

The Writer Says Soldiers of For tune Could Aid In Preparedness.

Will Irwin, the writer, believes the United States should corral the thou sands of Americans now in the various European armies, serving as sol diers, when the war is ended, bring them home, and have them teach this country some of the things which the great conflict has impressed upon their minds.

There are more than 30,000 Americans engaged in the European war, Irwin told the members of the Na-tional Press Club yesterday. These, he said, are doing more toward pre-paredness for the United States in later years, than the whole nation here, is doing toward that end.
